Hi Omar: please consider spending a few minutes reviewing this document as it shows what Lucita is looking for in how we are addressing (including ESA) comments in terms of formatting and writing style.

Thanks,

Douglas

On Monday's call, you had asked a couple of questions that made me think it would be helpful for you to see the RTC draft right now. It will give you a flavor of the comments we are responding to and the division of work so far. In the document, you will see some responses prefaced with "Response" and some prefaced with "EPA Response." Those prefaced with "Response" are our responses. Those prefaced with "EPA Response" are from Cadmus, and those still need review and editing. For the most part, the Class III section and Geology section will be answered by Valois, and the Class V section by Rick.

I have filled in most things that I can; I'm sure there are other responses I can help with after getting some input from Valois and Rick. The only things left for me right now are the "general concerns" section and the "outside of scope" section.
